Podcast with Toby Redshaw of Motorola and FIOS update

[\[link\]](#)

Last night we posted another DiamondCluster Wavelengths podcast. This one was with Toby Redshaw, Motorola corporate vice president, Corporate IT Strategy, Architecture and e-Business. Before Motorola he spent 17 years at Federal Express where he held several senior IT and business positions. Toby clearly knows his big company IT.

He talked about cell phones from an IT perspective. He talked about how they fit in with Motorola's internal IT environment, where innovation is coming from, Motorola's experience with Service Oriented Architecture (SOA) for IT and what they've learned, seamless mobility, and more.

Here are some points: They are working on "seamlessly mobile set of solutions...that allows you to move between networks...regardless of whether you are in your home, you're in your office, you're out on the carrier network, or you're in your car." [4:50]. With regards to SOA, two surprises: The

Topics

This log covers my thoughts on making web sites, the computer industry, digital photography, PC history, conferences I attend, and people I know or run into.

New readers may want to see my "[Best of this log](#)" page.

InfoWorld

Hyperlinks (are supposed to) matter

An InfoWorld article of mine called [Hyperlinks Matter](#) appeared online yesterday. As Robert J Seymour [points out](#), the title was ironic in view of InfoWorld's no-links policy:

If you really want to rally for better URL addressing, please start with your own article. This would be a far more useful article if direct links were provided to the quoted sources and mentioned discussions. [rsjr]

Agreed. I hope to see a more web-friendly InfoWorld in the future. Meanwhile, here are some of the links related to the piece:

- Sjoerd Visscher's [URIs for Dynamic Pages](#)
- [W3C Technical Architecture Group mailing list, May 2000](#)
- Paul Prescod's [Extreme Web Services posting](#) to rest-discuss
- W3C primer on [URIs, URLs, URNs...](#)

And here are some that were in the illustration that will appear in the magazine, but did not appear on the web:

1. Macromedia publishes an [XML-formatted newsfeed](#) for developers
2. The W3C's [XSLT transformation service](#)
3. An [XSLT stylesheet](#) that transforms Macromedia's feed into RSS format
4. An [RSS version](#) of the Macromedia news feed

XQuery Apache Module

From Freshmeat:

Native XmlDB Query Daemon is a client-server version of the Sleepycat native XML database deployed as an Apache module. The client is a pure Java API, supporting XQuery, XPath, and an Xml:DB API layer. It comes with a graphical admin console. Server binaries are provided for Linux x86 and x86-AMD64; for other platforms, compile from source.

*From [freshmeat.net](#): Project details for Native XmlDB Query Daemon

      <title>Dvorak is Clueless</title>
      <link>http://www.windley.com/2004/10/29.html#a1499</link>
      <description>&lt;p&gt;
John Dvorak &lt;a href="http://www.pcmag.com/article2/0,1759,1682993,00.asp"&gt;completely misses the point&lt;/a&gt; on podcasting.
He thinks its about streaming from a Web site. Someone needs to fill him in.

      <title>Standards-Based Slide Shows</title>
      <link>http://www.windley.com/2004/10/29.html#a1498</link>
      <description>&lt;p&gt;
If you've been looking for a way to create slides in XHTML and CSS, Eric Meyer has just the thing for you. &lt;a href="http://www.meyerweb.com/eric/tools/s5/"&gt;S<sup>5</sup></a> is a slide show system&lt;/a&gt; constructed from CSS, XHTML, and Javascript
which runs in most browsers. Run through the &lt;a href="http://www.meyerweb.com/eric/tools/s5/s5-intro.html"&gt;introductory slide
show&lt;/a&gt; to get a feel for its features (including slide advance when the space bar is pressed and a disappearing navigation menu). All
the slide content is in a single file, so once its loaded it's loaded. What's more, since its based on CSS, printable slides are
constructed from the same source file automatically. I don't think I'm ready to give up Keynote and Powerpoint just yet, but for
some things, this might come in real handy.
&lt;/p&gt;</description>
      <guid>http://www.windley.com/2004/10/29.html#a1498</guid>

Turtle Beach Noise Cancelling Headphones Review

The Turtle Beach Noise Cancelling Headphones had a pretty steep hill to climb with me right from the start, because I have a ~~middle~~ outer ear that is apparently atypically small, meaning there is nary a set of buds that will stay in my head for more than a few seconds at a time. These headphones were no exception, worming their way out of my ears (especially the left) every few seconds, as if the noise was coming out of the speakers like a jet flume. They were comfortable—the foam wrappers seem especially thick—but oversized and awkward.

Next refresh: 18:35 <http://www.gizmodo.com/archives/turtle-beach-noise-cancelling-headphones-review-024607.php>

XQuery Apache Module

From Freshmeat:

Native XmlDB Query Daemon is a client-server version of the Sleepycat native XML database deployed as an Apache module. The client is a pure Java API, supporting XQuery, XPath, and an Xml:DB API layer. It comes with a graphical admin console. Server binaries are provided for Linux x86 and x86-AMD64; for other platforms, compile from source.

*From [freshmeat.net](#): Project details for Native XmlDB Query Daemon

Today's featured article

The [Algerian Civil War](#) was an armed conflict between the [Algerian](#) government and various [Islamist](#) rebel groups which began in [1991](#). It is estimated to have cost over 100,000 lives. The conflict has effectively ended with a government victory, following the surrender of

the Islamic Salvation Army and the defeat of the [Armed Islamic Group](#). The conflict began in December 1991, when the government cancelled [elections](#) after the first round results had shown that the [Islamic Salvation Front](#) (FIS) party would win, citing fears that the FIS would end [democracy](#). Islamist [guerrillas](#) rapidly emerged and began an armed campaign against the government and its supporters. They formed themselves into several [armed groups](#), principally the Islamic Armed Movement (MIA), based in the mountains, and the [Armed Islamic Group](#) (GIA), based in the towns. The guerrillas initially targeted the [army](#) and police, but some groups soon started attacking civilians. The MIA and its allies, under attack from both sides, opted for a unilateral ceasefire with the government in 1997, while the GIA was torn apart by splits as various subdivisions objected to its new massacre policy. In 1999, following the election of a new

Brigham Young University

From Wikipedia, the free encyclopedia.

Brigham Young University (**BYU**, or simply **the Y**) was founded as [Brigham Young Academy](#) in [1875](#) by [The Church of Jesus Christ of Latter-day Saints](#) (LDS Church; see also [Mormon](#)).

It has grown to become one of the largest private universities in the [United States](#) and one of the world's largest church-affiliated schools, with an enrollment of roughly 32,400 undergraduate students at the beginning of [2003](#). BYU is located in [Provo](#).

The main campus sits on approximately 600 acres (2.43 km²) at the foot of the [Wasatch Mountains](#) and includes 333 buildings. The campus is extensively landscaped, with many flower beds, lawns, and trees. The buildings on the campus are mostly plain and utilitarian (with a few rare exceptions).

The students at BYU are overwhelmingly [LDS](#) ([Mormon](#)), drawn mostly from the national population of academically-oriented LDS high school students.

Additional facilities include a study center in [Israel](#) (the [BYU Jerusalem Center](#), not currently in operation); a satellite campus to the north in Utah's capital and largest city, [Salt Lake City](#), (the [BYU Salt Lake Center](#)); and study centers all over the world, including [Nauvoo, IL](#), a town that figures prominently in [Latter-day Saint](#) history (the [Joseph Smith Academy](#)).

The [LDS Church](#) also has sister four-year schools in [Lāʻie, Hawaii](#) ([Brigham Young University-Hawaii](#)) and [Rexburg, Idaho](#) ([Brigham Young University-Idaho](#)) These schools enroll an additional 12,000 students. The church also runs LDS Business College, a two-year school in downtown Salt Lake City. All these schools are institutionally independent from Brigham Young University, with their own administrations and accreditation.

Brigham Young University

Name	Brigham Young University
Location (main campus)	Provo, UT 84602
Established	October 16, 1875

Line 1:

The "'flat earth"' theory is the idea that the earth is flat, as opposed to the view of modern science that the earth is spherical.

People from antiquity generally believed the world was flat, as that is how it looks even from a high mountain. **Some ancient Greek philosophers began to discuss the idea of a spherical earth, notably Eratosthenes and Ptolemy.**

During the period between the fall of the Roman Empire and the [renaissance](#) of science several centuries later, some Christian writers questioned and even opposed the earth's sphericity, although it is not clearly known how influential their views were. **Before** the Renaissance began, the flat earth theory had **pretty much** died out, yielding by the 900s or 1100s to the idea that the earth is a globe.

Some Christians in England and America tried to revive Flat Earth thinking in the 19th century, and a few **diehards** hold out to this day (see [Flat Earth Society](#)).

== Flat Earth theories of Antiquity ==

Line 1:

The "'flat earth"' theory is the idea that the earth is flat, as opposed to the view of modern science that the earth is spherical.

People from **early** antiquity generally believed the world was flat, as that is how it looks even from a high mountain; **by the time of [Pliny the Elder](#), however, its spherical shape was generally acknowledged. [Ptolemy](#) derived his maps from a curved globe and developed the system of [latitude](#) and [longitude](#).**

During the period between the fall of the Roman Empire and the [renaissance](#) of science several centuries later, some Christian writers questioned and even opposed the earth's sphericity, although it is not clearly known how influential their views were. **Even before** the Renaissance began, the flat earth theory had **almost** died out, yielding by the 900s or 1100s to the idea that the earth is a globe.

Some Christians in England and America tried to revive Flat Earth thinking in the 19th century, and a few hold out to this day (see [Flat Earth Society](#)).

Quasiquotation and Unquote

We know that `quote` can be used to define a literal s-expression like so:

```
(define blogroll
  '((name "Technometria")
    (url www.windley.com)
    (description "Best blog I've ever read!")
    (updated 19 jan 2005 15:37)))
```

But suppose we want to create a function that creates a blogroll entry? Using what we know so far, we have to use `list`:

```
(define make-entry^
  (lambda (name url desc updated)
    (list (list 'name name)
          (list 'url url)
          (list 'description desc)
          (cons 'updated updated))))
```

Running this function gives us what we expect:

```
(make-entry^ "Technometria" 'www.windley.com
             "Best blog I've ever read!"
             '(19 jan 2005 15:37))

((name "Technometria")
 (url www.windley.com)
 (description "Best blog I've ever read!")
 (updated 19 jan 2005 15:37))
```

But this function loses some of the understandability of just using `quote`. In my opinion, you have to think just a little too hard to tell if you've got it right. Fortunately, there's another kind of quoting called `quasiquote` that quotes just like `quote` but has an exescape feature called `unquote`. We indicate a quasiquoted s-expression by prefixing it with a backquote (```) and indicate the expressions to be unquoted by prefixing a comma (`,`). Here's the `make-entry` function again:

```
(define make-entry^^
  (lambda (name url desc updated)
    `( (Name ,name)
      (Url ,url)
      (Description ,desc)
      (Updated ,updated))))
```
